

CRI FOUNDATIONS WORKSHOP DESCRIPTION

Workshop Description

The tools from Dr. Robert Mager's Criterion-Referenced Instruction (CRI) have made a tremendous impact in the field of instructional design throughout the world. Those same tools have application to every aspect of human performance in the workplace. As a participant of this workshop, you will learn the most foundational of those tools, including those of analysis, identifying job skills, and creating performance objectives. It is an abbreviated version of the full CRI workshop with additional training on applying CRI to any function of the workplace dealing with people. This is a self-paced workshop with modules containing practice with feedback and skill checks that you will complete for the facilitator.

How Long Is this Training?

The workshop is self-paced. It takes three to four full days to complete.

What Will You Receive?

- A workshop binder containing all of the instructional modules
- A thumb drive containing worksheet templates and job aids
- A copy of six books that comprise the Mager Six Pack

Who Should Attend?

You should attend this workshop if you cannot attend the full CRI Workshop and/or your work functions include HR, training, performance evaluation, or career management.

What Will You Learn to Do?

Upon completion of the workshop, you will have demonstrated the following skills:

- Analyzing Human Performance
- Creating Clear Communication in the Workplace
- Performing Task Analysis
- Analyzing Target Populations
- Identifying Job Skills
- Deriving Performance Objectives
- Drafting Skill Checks
- Applying CRI to the Workplace
